
5kw on solar container grid inverter for sale in New Zealand

What is a solar inverter?

A solar inverter converts the energy output from solar panels into a usable electricity form, to be used in your home or business. Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power.

What do I need for a solar system in New Zealand?

All cables, DC circuit breakers, PV combiner box necessary for battery and inverter hookup. Please enquire about delivery This is our most popular system with the best value in New Zealand for the main components for your own solar system. Our panels, inverters and batteries are all premium products.

What types of inverters are available?

Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power. When there is solar energy to use, the system will deliver it and when there is insufficient energy to deliver, the system will switch back to grid power.

What is a hybrid inverter?

The Hybrid Inverter enables you to optimise the amount of power you generate and consume, and minimise transfer of energy to/from the grid or generator power. You can increase the proportion of self-use energy generated by your solar system, from 20% to more than 80%!
