
After-sales service for 350kW photovoltaic container

Does a PV system need energy storage equipment?

A: We provide one-stop service, including program design, system equipment, transportation and installation, grid-connection technical support, and after-sales service. Does a household PV system need energy storage equipment? A: We recommended that the household photovoltaic power generation system eventually be connected to the power grid.

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks, with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

Can a distributed photovoltaic system be installed in commercial housing?

A: It depends on the actual area available on your roof. Generally, 10 square meters are required for a 1 kW system. Can a distributed photovoltaic power generation system be installed in commercial housing? A: Yes. You need to explain the situation to the residents in your building and the property management department.

How long does it take to install a solar panel container?

Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel unit for quick installation. Folding solar panel inside the container can be unfolded or stowed in as little as 1h (the time does not vary for different photovoltaic containers).
