
Base station communication tower inspection company

What is a communication tower inspection?

Communication tower inspections are generally tall and complex structures that require a unique and highly specialist approach to inspection. With modern technology, communication and cell towers can be undertaken using drone tower inspection techniques to inspect 'remotely', using both UAVs (drones) and ground-based giga-pixel camera systems.

Why should you choose tower inspection services?

At Tower Inspection Services, we take pride in ensuring communication towers' safety, reliability, and optimal performance, empowering your network to reach new heights. Our comprehensive range of services is designed to address every critical aspect of tower inspection, providing peace of mind and minimizing potential risks. 1.

What are the services in remote communication and cell tower inspection?

The services in remote communication and cell tower inspection are ideal for pre-shutdown surveys to determine where there is a need for personnel to manually inspect a tower, which involves higher risk.

What is drone tower inspection?

The drone tower inspection methodology at Applus+ has been extensively tried and tested over the last ten years. We use systems in UAV infrastructure inspection to capture top-down and horizontal viewpoints. These perspectives are only obtainable from the air, and we use 40 to 50-megapixel cameras to ensure maximum resolution is achieved.
