
Belgrade energy storage power trading

Are battery storage systems a good investment in Europe?

Battery storage systems (BESS) are poised for significantly higher profits across Europe, with Rystad Energy analysis suggesting potential increases of over 15% in some countries. The positive shift follows changes to the European Union's (EU) power pricing structure introduced in October, making the economics of BESS projects much more attractive.

Will EU 15-minute power trading rules boost European battery storage system profits?
New EU 15-minute power trading rules boost European battery storage system (BESS) profits by over 15%, enhancing long-term arbitrage revenues.

What is battery energy storage system (BESS)?

This change offers Battery Energy Storage System (BESS) operators enhanced opportunities for arbitrage--buying electricity during low-price periods and selling it when prices are higher. Since its implementation, this new system has led to an average increase of 14% in arbitrage potential across European power markets.

The EU's new 15-minute power pricing system, implemented in October, has increased arbitrage potential for battery storage by 14% on average, enhancing project returns.

Profits from battery energy storage in Europe have risen since the EU overhauled its power markets, but analysts warn that current high margins are unlikely to last over the next ...
