# Billions of funds invested in wind solar and storage industries

What percentage of energy investments are made by private households?

The share of total energy investments made or decided by private households (if not necessarily financed by them directly) has doubled from 9% in 2015 to 18% today, thanks to the combined growth in rooftop solar installations, investments in buildings efficiency and electric vehicle purchases.

Where do energy investments come from?

Three quarters of global energy investments today are funded from private and commercial sources, and around 25% from public finance, and just 1% from national and international development finance institutions (DFIs). Other financing options for energy transition have faced challenges and are focused on advanced economies.

How much money did China invest in energy in 2024?

Global investment in the energy transition hit a record \$2.1 trillion in 2024, climbing 11% from a year earlier. Mainland China has returned to the driving seat, accounting for two-thirds of the global increase seen last year. The global clean energy supply chain saw \$130 billion in new investment, despite ongoing struggles with overcapacity.

How big is solar energy investment in 2024?

Both in terms of volume and share, this is far below the amounts that are required to ensure full access to modern energy and to meet rising energy demand in a sustainable way. Power sector investment in solar photovoltaic (PV) technology is projected to exceed USD 500 billion in 2024, surpassing all other generation sources combined.

This figure includes spending on passenger EVs, electric two- and three-wheelers, commercial electric vehicles, ...

Regionally, China is by far the largest contributor to renewable energy investments worldwide, with more than 137 billion U.S. dollars invested in 2021, and is followed by Europe, ...

In 2024, China allocated 6.8 trillion yuan (\$940 billion) into clean energy, bringing its investment close to the global fossil fuel funding total of \$1.12 trillion, according to a new ...

Clean energy supply chain investment Clean energy supply chains, including equipment factories and battery- metal production assets, saw \$130 billion in investment in ...

---

The National Development and Reform Commission oversees the Zhangjiakou Renewable Energy Pilot Zone, which incorporates wind, solar, energy storage and hydrogen technologies. ...

The surge in the deployment of energy storage around the world - and the associated increase in co-located wind and storage and solar and storage projects - is ...

This figure includes spending on passenger EVs, electric two- and three-wheelers, commercial electric vehicles, public charging infrastructure and fuel cell vehicles. Investments ...

China's \$625 billion clean energy boom pushes wind and solar past fossil fuels, reshaping global markets and fossil fuel demand outlook.

Nonetheless, solar and wind represent the primary constituents of any RE policy. As a result of their technological maturity, solar and wind energy projects are currently seeing a ...

China's renewable energy sector experienced a stellar year in 2024, with the total installed capacity of wind and solar power surpassing 1.4 billion kilowatts, further reinforcing ...

More than \$ 757 billion was invested in passenger and commercial EVs, electric two- and three-wheelers, and public EV-charging stations. That's a 20 % increase from 2023. ...

The country's investment in energy transition reached \$676 billion last year, making it the world's largest investor in this field, according to the white paper titled "China's ...

Utility-scale solar and storage investments increased 56% and 130%, respectively, from their pre-IRA levels, while wind investment declined by 52%. The \$28 billion invested in ...

The rise in solar and wind deployment has driven wholesale prices down in some countries, occasionally below zero, particularly during peak periods of wind and solar ...

In 2024, China allocated 6.8 trillion yuan (\$940 billion) into clean energy, bringing its investment close to the global fossil fuel funding total ...

This report covers new investment in renewable energy capacity, and equity raising by specialist companies in renewables and related areas such as energy storage. Overall, ...
