
Buenos Aires Smart Solar Power System

Does Argentina have a battery energy storage system?

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program.

Is Buenos Aires a good place to buy a battery?

Buenos Aires, with its dense urban load and aging infrastructure, is an ideal candidate for such an upgrade. Moreover, this tender arrives at a time when battery prices are becoming increasingly competitive, and international developers are actively seeking new markets with clear regulatory frameworks and stable revenue models.

Who is distact energy Argentina SR?

The result: the founding of our subsidiary DISTACT Energy Argentina SR in August 2024 and the first major milestone - a solar roof system on the company building of Vier Abinet S.A. - went online in February 2025. This is where German engineering meets local expertise - for a clean and reliable energy future in Argentina. Why Argentina?

How can Argentina improve energy security?

Argentina's expansions could help diversify the energy mix and enhance energy security. It aims for renewables to account for over 50% of electricity generation by 2030. These ambitions could help reduce energy demand by at least 8% through efficiency measures and responsible consumption.
