
China transfer switch breaker in Auckland

How does a transferpact switch work?

Transferpact transfer switches perform changeover between 2 or 3 power sources, by controlling and synchronizing incoming devices on each side, either circuit breakers or switch disconnectors. Need help? Quickly and easily find the right products and accessories for your applications.

What type of switch does nhp offer?

NHP offers a complete range of manual multi-polar changeover and bypass switches that provide safe and reliable transfer between two sources of incoming power supply when operated locally by personnel. They are available in standard or visible break contact variants with a comprehensive range of accessories including mechanical interlocking.
