# Combined Bidding Price for Folding Containers Used in Wastewater Treatment Plants

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a containerised portable sewage treatment plant?

A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable wastewater volumes to achieve any effluent quality.

What is a containerised mobile sewage treatment system?

Containerized mobile treatment systems are ready to use immediately on delivery and cater from 60 persons to 20,000 persons capacity. A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a packaged sewage treatment plant?

For small scale commercial wastewater treatment applications, we preinstall all treatment modules (processes) inside a single container. The complete treatment process including primary settlement, secondary treatment and clarification happens within the container. This type of packaged plant is ideal for temporary and mobile sewage treatment.
