
Construction site charging mobile power box

Can ETEC Powerbox be used on construction sites?

Optionally, the ETEC Powerbox can be equipped with an integrated DC fast charger with a charging capacity of up to 200 kW charging power allowing electric machines to be recharged at lightning speed. The ETEC Powerbox excels in versatility, reliability, and sustainability. It offers much more than just power on construction sites.

What is a PowerBox and how does it work?

With its optional integrated DC fast charger of up to 200 kW, the Powerbox enables ultra-fast charging. This makes it fully prepared for the energy demands of tomorrow: powerful, future-proof, and completely emission-free. The Powerbox can also be combined with a generator, creating a hybrid energy configuration.

What are the advantages of a powerbox?

Another unique advantage: the Powerbox can serve as an energy buffer. This means that even with a small grid connection, you can charge high power levels, eliminating the need for large grid connections. As a result, fully electric equipment can be deployed even in remote or grid-constrained locations.

As the construction industry shifts toward zero-emissions equipment, one significant challenge remains: recharging electric heavy equipment. ...

A lightweight and mobile construction site battery, ideal for craftsmen The use of PowerCase aligns perfectly with the construction industry, artisans, and building professionals. Its compact ...

The ultimate guide to building a professional-grade power toolkit for mobile offices and construction sites, covering high-output power stations, solar panels, heavy-duty ...

Here are Key Advantages of Electrify Hub's Mobile Charging Units (MCUs Enhanced Flexibility and Efficiency Mobile charging units offer adaptability across locations, ...

The ETEC Powerbox offers emission-free construction site solutions, grid buffer, clean power for events, and mobile charging station.

As the construction industry shifts toward zero-emissions equipment, one significant challenge remains: recharging electric heavy equipment. Transporting large machines off-site to ...

Discover how PowerOnTheGo enables off-grid, AFIR-compliant EV charging on remote

construction sites, reducing fuel costs and CO2 emissions.

Efficient and Durable EV Charging Solutions for Construction Sites FLEXX Mobile DC Fast Chargers bring flexibility and power to construction sites, ensuring your electric fleet ...

De eBosBox is the only mobile car charger on the market that meets all standards for safe and efficient charging of electric vehicles on ...

The Solution: Mobile Power Unit for Construction Equipment XiaofuPower's mobile energy storage systems are designed to be plug-and-play, enabling immediate deployment across ...

Charging solutions with intermediate storage units continuously recharged from the power grid represent one possible solution: The mobile fast-charging solution ensures ...

Portability matters: Choose lightweight models with ergonomic designs and wheels for easy transport across job sites. Fast charging capabilities: Select power stations that can ...

De eBosBox is the only mobile car charger on the market that meets all standards for safe and efficient charging of electric vehicles on construction sites. Whether for small ...

A lightweight and mobile construction site battery, ideal for craftsmen The use of PowerCase aligns perfectly with the construction industry, artisans, ...

In modern construction, boom lift mobile chargers are becoming increasingly important to meet the charging needs of various aerial work platforms. The right charging ...

Third-party charging and energy storage systems are proliferating. These can provide off-the-grid-power, pinch hit for generators, or pair with generators when needed for a ...
