
Cost of a 100kW Solar Containerized Solar System for Australian Farms

How much does a 100kW Solar System cost in Australia?

A high-quality 100kW solar system in Australia typically starts from around A\$39,999, making it a cost-effective choice for medium to large businesses, schools, warehouses, shopping centres, or community facilities. Installation usually costs between A\$1,000 and A\$3,000, depending on your roof type, system complexity, and location.

Where can I install a 100kW Solar System in South Australia?

South Australia is renowned for its abundant sunshine, making it an ideal location for a 100kW solar system installation. The state offers various incentives to businesses willing to go solar, providing a favorable environment for such investments. Adelaide, the capital city of South Australia, is another hotspot for solar installations.

Are solar farms a viable option for Australia's energy landscape?

While the initial investment and land-use issues present challenges, the long-term environmental and economic benefits are undeniable. As solar technology costs continue to decline, and with government support, solar farms will become an even more viable and essential component of Australia's energy landscape.

How much does a commercial solar system cost?

On average, the 100kW commercial solar system will cost around \$86,845, including government rebates and taxes. The actual cost will depend on the installer you choose and your location in the country. Besides its energy generation potential, this system is widely popular because it's the cut-off size for the Australian government rebates.
