
Cost solar container leasing options

How much does a solar lease cost?

Solar lease payments range from \$150 to \$200 per month on a standard 25-year agreement. Your actual monthly costs can vary depending on a few factors, including the system size and your energy needs, according to Landon Wimmer, CEO and owner of Empower Home Services. In most cases, the lease payment is below the utility's average electricity cost.

Is solar leasing a good option?

As with any solar financing option, solar leasing comes with its share of pros and cons: As long as your contract is structured competitively, solar leases should reduce your monthly energy costs compared to what you'd pay your utility company.

What is a solar lease?

You can think of a solar lease like a car lease: It's a form of third-party ownership (TPO) where you don't own the product that you're paying for. Under a solar lease, a third-party owner (typically a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate.

Should you buy or lease a solar system?

Solar leases offer an alternative path to clean energy without requiring a large initial investment. Instead of buying the system, you pay a fixed monthly fee to use the energy it generates while a third-party company owns and handles maintenance.

Discover the costs of leasing solar panels and how it compares to other financing options. Learn about monthly fees, upfront costs, potential savings, and benefits like maintenance coverage. ...
