
Current solar panel prices in Georgia

How much do solar panels cost in Georgia?

On average, installing solar panels in Georgia costs about \$19,635 after taking into account the federal solar investment tax credit. That's roughly 17% more than the U.S. average of \$16,715. While solar panels in Georgia are relatively pricey, the savings over 25 years can add up to \$23,182. That can make it well worth going solar.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to "bulk pricing".

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.
