# Czech New Energy Storage Policy

What is the current energy policy in the Czech Republic?

The government is in the process of revising the country's energy policy and legal frameworks. The "State Energy Policy" (SEP) is the main strategic document guiding energy policy in the Czech Republic (MPO,2014). The current SEP dates from May 2015 and contains an outlook to 2040.

What is the current gas storage capacity of the Czech Republic?

Current capacity is 3.3 bcm and once the ongoing expansion projects are completed in 2022, the country's total storage capacity available will be almost 4 bcm. This is almost half the current annual gas consumption of the Czech Republic, and such a ratio is very high compared to the level of storage capacity in other countries.

Is the Czech Energy Act Amendment a step towards a clean future?

Czech Energy Act Amendment - A Step Towards a Clean Future? The long-awaited amendment to the Czech Energy Act, known as "Lex OZE III", has officially been passed by the Parliament. While it introduces significant and predominantly positive changes to the clean and renewable energy sector, it has also sparked considerable controversy.
