
DBS3900 base station scene 1 outdoor

What is DBS3900 dual-mode base station?

DBS3900 Dual-Mode Base Station is the fourth generation base station developed by Huawei. It features a multi-mode modular design and supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).

How many working modes does the DBS3900 support?

Based on the unified hardware platform, the DBS3900 supports three working modes: GSM mode, GSM+UMTS dual mode, and UMTS mode through configuration of different software. In addition, the DBS3900 supports smooth evolution to the Long-Term Evolution (LTE).

What is a DBS3900 antenna?

As mentioned, the DBS3900 consists of a BBU3900 (or BBU3910 or BBU3910A1 or BBU3910A3) and RRUs\AAUs. In a distributed installation scenario, RRUs can be installed close to the antenna system to reduce feeder loss and improve base station performance. Table 2-1 shows the typical installation scenarios for the DBS3900. AC or 220 V AC.

How does the DBS3900 work?

The DBS3900 fully addresses operators' concern over site acquisition, facilitates network planning and optimization, and shortens network deployment time. It enables operators to efficiently deploy an LTE network with a low TCO by minimizing the investment in electricity, space, and manpower.

BTS3900A Cabinet Outdoor Macro Base Station DBS3900 offers reliable fiber optic patch cords, IP networking, and POE support for efficient wireless LAN. | Alibaba
