
Democratic Republic of Congo Independent Energy Storage Project

Could the Congo become an electricity exporter?

Almost all electricity generation today comes from hydropower and the Inga project has the potential to provide much more. If network constraints are addressed, Democratic Republic of the Congo could become an electricity exporter.

How does the Democratic Republic of the Congo support the economy?

In the AC, Democratic Republic of the Congo supports an economy six-times larger than today's with only 35% more energy by diversifying its energy mix away from one that is 95% dependent on bioenergy.

How will a green mini-grid impact the DRC?

Successful implementation is expected to spur future development of private sector green mini-grids that not only address the country's clean energy targets but also reduce the country's GHG emissions from the energy sector by displacing diesel-based generation across the DRC.

What are the barriers to power supply in DRC?

Key barriers to the provision of appropriate power in DRC include heavy reliance on hydropower generation, of which less than 50% is currently available for generation due to aging infrastructure and lack of maintenance, and the underdeveloped power grid which only covers the southern and the eastern region.
