# Electricity price for telesolar container communication stations in Iran

Who controls the energy sector in Iran?

The Ministry of Energy is in charge of the electricity sector and oversees the energy efficiency and renewables policy. Tavanir (Iran Power Generation, Transmission and Distribution Management Company) is the vertically integrated national electricity company and controls 16 regional electricity companies.

What is the price of electricity in Iran?

Iran, September 2022: The price of electricity is 0.005 U.S. Dollar per kWh for households and 0.000 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

How much solar power does Iran have in 2021?

In the 6th Plan, the country aimed at reaching 4.5 GW of wind and 0.5 GW of solar capacities by 2021, with an additional 2.5 GW by 2030. The 2021 targets were missed by far. As of 2023, only 350 MW of wind and 1 GW of solar are in operation. Because of the economic sanctions, Iran has not ratified the Paris Agreement and has not submitted its NDC.

How much energy does Iran use a year?

Energy consumption has stabilised since 2018 and stood at 274 Mtoe in 2021. It grew by +3.7%/year between 2010 and 2018. Iran aims to develop its hydrocarbon resources, particularly its gas exports, which have been slowed due to the COVID-19 pandemic in 2020, on top of the renewed US sanctions and increased geopolitical tensions.
