
European solar Module Project

How much does a solar module cost in Europe?

Producing a solar module in Europe with EU-made solar cells costs around EUR0.103 (\$0.12)/W more than producing the same module in China, according to a new report.

Why is reshoring solar module manufacturing to Europe a problem?

The Reshoring Solar Module Manufacturing to Europe report, by SolarPower Europe and the Fraunhofer Institute for Solar Energy Systems (ISE), says the gap is caused by higher costs for equipment, materials, labour, buildings and facilities.

How can we support solar manufacturing in Europe?

It suggests establishing an EU-level output-based support scheme dedicated to solar manufacturing that encompasses grants, loans and de-risking instruments for scaling up solar manufacturing in Europe, while also covering capital and operational expenditures in the shape of production-based support.

What is Solarpower Europe?

SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European energy system. Get to know everything about solar power. Interested in joining SolarPower Europe? Become a member! If playback doesn't begin shortly, try restarting your device.

Designated by the French government as a "Project of National Interest" receiving priority support, this initiative holds significant strategic importance for strengthening Sino ...

What are the optimal levels of strategic solar module stockpiles in the European Union (EU) for achieving climate neutrality by 2050, and how might su...

European Energy has secured contracts for difference (CfD) tariffs from the Italian energy agency, GSE, for five utility-scale solar projects totalling 513MW. Located across Sicily, ...

A comprehensive analysis of the 2025 European commercial and industrial photovoltaic policy map, focusing on deployment strategies, incentive comparisons, and zero ...

3Sun 3Sun factory, founded in Catania in 2010, is set to become Europe's largest factory producing high-performance bifacial photovoltaic modules. 3Sun Gigafactory combines ...

Traditional methods use large amounts of energy, raw materials, and expensive metals like silver. These processes also generate waste and have a high carbon footprint, ...

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap ...

Europe's last remaining solar PV players join forces against China threat New group unites European producers of equipment at the heart of EU grid vulnerability

Funded by the European Union, the project brings together 22 leading global partners, all working to enhance the efficiency and stability of large-area perovskite solar ...
