
Financing for 80kWh Solar Container Used in Sports Venues

Do stadiums need solar energy?

While more and more stadiums take the leap to develop on-site solar energy generation systems to minimize the environmental impact of their energy use while realizing the associated financial and brand benefits, there is significant potential to do more.

Does Chase Field own solar energy?

The utility owns both the energy and the Solar Renewable Energy Credits (SRECs) produced by the system. Solar Energy Utilization: While Chase Field serves as the system host, the energy and SRECs feed directly into the APS grid and are used to meet the utility's state renewable mandates.

Is a golden age of solar installation coming to sports facilities?

Collegiate athletic and recreation facilities across the United States have installed more than three dozen solar arrays. Long overdue, a Golden Age of solar installation at sports facilities seems to be emerging. Numerous sports venue operators cite the BEF/NRDC Solar Guide as a useful tool they relied on to navigate the launch of their projects.

How many solar panels are installed at pro sports facilities?

Since the first edition of the BEF/NRDC Solar Guide was published, the installation of solar arrays has proliferated at professional and collegiate sports facilities. As of this writing, there are 18 solar installations at pro sports facilities in North America (11 of which were installed since 2010) and many more around the world.
