What is the largest crude oil field in Germany?

The largest German crude oil field is the Heide-Mittelplate I field in the Schleswig-Holstein Wadden Sea (Wattenmeer) National Park. It has been developed since 1987 by a drilling and production platform and by oil well facilities on the mainland. This oil field accounted for about half of Germany's total crude oil production in 2022 and 2023.

How many oil fields are there in Germany?

In 2022, 43 oil fields were in production in Germany. These fields extract oil by means of some 683 production wells in drilling installations (onshore) and production platforms (offshore). In 2022 and 2023, the oil fields of Schleswig-Holstein and Lower Saxony yielded almost 90% of the total German production.

What's going on with Germany's largest oil field?

Meanwhile, drilling for the new A32 well at Mittelplate began - marking another significant milestone in the development of Germany's largest oil field. Additionally, preparations are underway for our hot water project in Emlichheim, which will significantly reduce the energy consumption and CO<sub>2</sub> emissions of our oil production there from 2026.

Where is harbour oil & gas produced in Germany?

Harbour is one of the largest oil and gas producers in Germany with a significant operated position.
