# Ghana Energy Storage Products Export Company

Is Ghana an electricity exporter?

Since 2007, Ghana has become an electricity exporter and since 2011 an exporter of crude oil, and natural gas, and a generator of electricity by thermal energy, hydropower, solar energy and renewable energies since 2012.

What type of energy does Ghana use?

Ghana's thermal power generation is fueled largely by natural gas, but occasionally uses light crude oil and diesel. Ghana exports power to Togo, Benin, and Burkina Faso. The Government of Ghana remains heavily involved in the energy sector, with state entities having a controlling presence in the value chain.

Why is the energy sector a problem in Ghana?

Long delays in payments to power producers are a significant concern in the sector as the government pays for the subsidy from the national budget. Debt within the energy sector, coupled with the high cost of power in Ghana, creates a brake on Ghana's economic development.

Why is Ghana's energy sector in debt?

Ghana's energy sector has significant debt because of years of accumulated financial shortfalls from power pricing that does not recover full cost, although residential and business electricity consumers consider tariffs to be high.
