
High quality power switchgear in Netherlands

What is MV switchgear?

MV switchgear is a full range of primary or secondary distribution equipment for controlling, protecting and isolating power distribution systems across utility, commercial and industrial applications. It uses Air, Gas, or Shielded Solid Insulated technologies to minimize and extinguish any electrical arc created during electrical switching.

Who uses ZPUE switchgear?

Our switchgear are used, for example, by industrial customers, grid operators for generation and distribution, but nowadays also for wind and solar parks. Our single rail version of ZPUE is available from 12 to 36 kV and a maximum rail current of 2500A and a maximum short-circuit current of 31.5kA-3s.

What is air insulated switchgear for primary distribution?

Our air-insulated switchgear for primary distribution are designed in accordance with the current IEC 62271 standard and are a reliable link in the primary distribution of energy and are used in a variety of demanding situations.

Why should you choose a switchgear company?

Your advantage: you will receive all services from one company. Customer proximity is just as important to us as short distances, fast response times, and high availability. Meaning that you get the product you need quickly. In addition, we are extremely flexible in the manufacture of our switchgears.
