# Home NAS Uninterruptible Power Supply

What is a NAS ups & how does it work?

Protect Device and Prevent Data Loss. With 12000mAh battery capacity, no matter blackouts or storms, this UPS provides uninterrupted power support and extends the running time of NAS about 10 minutes during an unexpected power outages in home or office.

How to choose the right uninterruptible power supply for Synology NAS?

Sep 2025 Choosing the right Uninterruptible Power Supply (UPS) for Synology Network Attached Storage (NAS) is crucial to protect data from power interruptions and ensure system stability. For 1-2 bay NAS devices, from 500-850VA should be enough (with desktop PC and router connected). For 4-8 bay NAS devices go from 1000-1500VA.

Does a NAS need an ups?

More expensive units will not only have larger batteries, but also additional outlets, ports, and even the ability to share data with a NAS. By connecting the UPS to a NAS with a data connection, the UPS can tell the NAS how much battery is left and have it safely shut down. It's not just a NAS the UPS can provide power for.
