What is a SELCO arc flash relay?

Circuit breakers or overcurrent protection devices alone do not provide optimal protection for your personnel and equipment. A SELCO Arc-Flash Relay rapidly detects an arc flash and sends a trip signal to interrupt power in milliseconds.

How do arc flash relays work?

All Arc flash relays can connect with remote light sensors to detect arc flashes quickly and send a trip signal to interrupt power. They can be used for stand-alone devices or embedded in complex switchgear layouts. Our arc flash relays are trusted for workplace safety by B2B buyers worldwide.

Why should you use arc flash protection?

Arc Flash Detection - Explosion risk, injury to personnel and costly downtime can be avoided with an Arc-Flash Protection solution for surveillance of switchboards, transformers, and capacitor load banks, etc. Circuit breakers or overcurrent protection devices alone do not provide optimal protection for your personnel and equipment.

What is AFR arc protection relay?

The AFR series arc protection relay detects electrical arcs in medium and low-voltage equipment, isolating power to minimize the risk of electrical fires. It works to prevent arcing faults in busbars, metal-clad switchgear, and cable boxes.
