
House tile solar energy

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How do solar tiles work?

Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof. Photovoltaic cells in solar tiles turn sunlight into direct current (DC) energy.

Which solar tiles are right for Your House?

GB-SOL solar tiles - Located in Pontypridd, Wales, GB-SOL solar tiles are lighter than traditional tiles, at 3.5kg per slate, which means you could replace your roof without having to strengthen your property's structure. Solecco Solar - Solecco Solar offers tiles in eight different colours, from smooth grey to terracotta and old English dark red.
