
Imported backup uninterruptible power supply

What is an uninterruptible power supply (UPS)?

However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) comes in. Its main function is to act as a big battery that powers your devices when your electricity goes out.

What is a UPS battery backup?

When power is interrupted, or fluctuates outside safe levels, a UPS will instantly provide clean battery backup power and surge protection for plugged-in, sensitive equipment. APC, our flagship brand, offers UPS options for computers, peripherals, networks, servers, as well as data centres, and facilities. Need help choosing a UPS battery backup?
