
Uninterruptible power supply eaton

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) can support power-heavy devices and ensure sustained access to a power supply in the event of a power outage. During power failures, an industrial UPS power backup can provide critical infrastructure with enough power to operate and backup data until the restoration of the main power supply.

Why should you choose Eaton industrial UPS?

In large industrial facilities, power failures are highly detrimental for the operational efficiency. Our Eaton industrial UPS systems (Uninterruptible Power Supply) can mitigate such effects with our advanced functionalities and features. These extensive services include extended power back up and protection against several power quality issues.

What is an Eaton UPS system?

Our Eaton UPS systems can save your sophisticated and critical equipment from abrupt power failure, voltage fluctuations, harmonics, surges, transients or other specific industrial conditions. Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment.

Is Eaton a reliable backup power supply?

Eaton is a leading provider of backup power UPS, or uninterruptible power supply. Eaton UPSs deliver high quality, reliable backup power for everything from network closets and server rooms to enterprise and colocation data centers.

The Uninterruptible Power Supply Eaton Powerware 9355 is a compact, double-conversion UPS ideal for small to medium-sized data centers, healthcare facilities, and industrial applications.

The Eaton 93PM UPS was built for data centers, medical facilities, educational institutions, and more. Explore Eaton's critical backup solution.
