
Madrid Valley Electric Energy Storage Device Supply

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

Will Madrid become a central base for energy storage systems?

"Our strategy is very clear: to turn Madrid into our central base for energy storage systems. From there, we'll provide agile and specialized support to clients across Europe and Latin America," Gattoni explained.

Why is battery storage so important for Bioforestal del Mediterráneo?

Bioforestal del Mediterráneo CEO Enrique Madrid said: "Battery storage is a critical element for us to advance energy transition and MARS's advanced solution aligns perfectly with our vision for a cleaner, more efficient energy future.

Which country has the most energy storage systems in Europe?

With more than 20,000 megawatts, Spain is the country with the largest number of energy storage systems in Europe measured by power, and has the second largest number of projects: 128 in total; second only to Germany's 169.

With Intersolar Europe 2025 as a platform to highlight its evolution, Risen Energy emerges as a strategic partner in the global energy transition, combining cutting-edge storage solutions, ...
