
Mobile energy storage export

What is a mobile energy storage system?

Mobile energy storage systems (MESSs) can be self-mobile electric vehicles (vans, buses, or light-duty vehicles) or towable (semi-trailer trucks). During restoration purposes, MESS should be dispatched to the desired location (non-black start generator unit locations).

Why did Tesla export a battery?

This export highlights Tesla's further expansion in the global energy storage market, and also underlines the extension of its battery technology from electric vehicles to energy storage, according to the company. "Megafactory gives us the ability to scale production and efficiency," said Mike Snyder, vice president of Tesla.

Did Tesla ship a Megapack energy storage system to Australia?
