# Nordic Communications 5G Base Station Bid Opening

How many 5G base stations will China have in 2023?

In April 2023 China's Ministry of Industry and Information Technology (MIIT) announced that Chinese operators now serve over 620 million subscribers from "over 2.64 million base stations...(and) China plans to add around 600,000 (additional) 5G base stations this year (2023) to increase .to 2.9 millionby the end of 2023."

Who is the most important buyer of 5G base station equipment?

In short,CMCCis the most important buyer of base station equipment in the world. It is therefore highly significant that in its latest round of tenders for 5G base station equipment in the 2.6 GHz frequency range,China Mobile decided to award 16.33% of the order volume to Ericsson (Sweden) and 10.28% to Nokia (Finland).

How many low-band base station deployments did Ericsson & Nokia receive?

Nonetheless,the awards represented a significant volume of new low-band base station deployments - 9,606for Ericsson and 19,215 for Nokia. Going forward both Ericsson and Nokia are likely to continue to receive ongoing base station orders from China Mobile and other Chinese operators for continued expansion of their earlier deployments.

Will Nokia & Ericsson capture China Mobile's CMCC base stations?

After years of research and development and multiple small deployments Nokia and Ericsson are poised to capture a significantly greater share of China Mobile's (CMCC's) base stations. This is the result of years of commitment to 5G technology development to meet the requirements of the vast Chinese market.
