
Norway Bergen Mobile Power Station Generator Set

Where is Bergen Generating Station?

Bergen Generating Station is a gas-fired power plant owned and operated by Public Service Electric and Gas Company (PSE&G). It is located on the banks of Overpeck Creek near its confluence with the Hackensack River in Ridgefield in Bergen County, New Jersey, United States.

Does Marelli Motori make a generator for Bergen Engines?

Marelli Motori, thanks to its 130+ years of experiences in offering tailor-made solutions, has enlarged its product portfolio with a new generator series fully customized to fit the Bergen Engines' V design.

What are Bergen Engines used for?

At sea, Bergen engines power generators for offshore oil & gas installations and on board a wide range of ocean-going vessels. Bergen engines can also be found in direct propulsion applications. On land, Bergen engines are principally found driving alternators in power generation applications, either singularly or in multiples up to 200MW.

Where can I find a Bergen engine?

Bergen engines can also be found in direct propulsion applications. On land, Bergen engines are principally found driving alternators in power generation applications, either singularly or in multiples up to 200MW. Find out more about our extensive spare parts inventory.

Over 130MW to independently power US data center Bergen, Norway - June 4, 2025. Bergen Engines has secured an order commitment for its first independent power ...

In January 2022, the Langley Holdings Power Solutions Division was formed to focus on the development of hybrid-renewable microgrids based on a collaboration between ...
