## Off-grid pricing for foldable shipping containers used on Australian islands

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

How much does a pre-owned container cost?

Pre-owned containers offer a considerable cost advantage, with prices ranging from \$1,500 for a standard 10ft model to approximately \$3,500 for a larger or better-condition 40ft container. Opting to rent a container can provide a budget-friendly answer for short-term requirements.

How much does a new shipping container cost?

Brand new shipping containers provide the benefit of impeccable condition and extended lifespan. A 20ft container in pristine condition may be priced between \$3,000 and \$5,000, while a 40ft container could range from \$5,500 to \$8,000.

How many foldable containers are needed for the Inland network?

Out of a total of about 5000 containers, an estimated fleet and critical mass of just 695 foldable containers are required for the inland network under study (and the rest of the containers being conventional ones), with a 71% load factor on the back haul.
