Who is a hybrid solar power installer?

Sunergy is your experienced Hybrid Solar Power installer for residential homes. Hybrid solar uses solar, battery and grid power. Our expert-designed solar energy installations can pay off and continue saving on power bills.

How do I upgrade from an on-grid solar system to a hybrid system?

Here are some steps to upgrade from an on-grid solar power system to a hybrid system: Evaluate your energy needs: Determine your energy needs and identify the amount of backup power you require during an outage.

What is a hybrid solar inverter?

Hybrid solar is still grid-tied but has a battery bank available so that excess energy is used to charge the batteries. Stored energy can then be used in the evenings and overnight. Hybrid solar inverters also have an emergency power function so that essential loads can be run off the solar panels or batteries in the event of a power failure.

What types of solar inverters are available in NZ?

There are different types of inverter available. This includes inverters that can connect to the electricity grid based on your home's connection. One of the most common types of solar inverter in use in NZ, however, is the hybrid inverter.

Inverter technology plays a critical role in modern solar power systems. It converts the direct current (DC) generated by solar panels into alternating current (AC) used by electrical devices. ...
