What is an uninterruptible power supply (UPS)?

A solid Uninterruptible Power Supply (UPS) can be a real lifesaver, keeping everything running smoothly when the lights go out. We've done some digging into the top picks, backed by data and expert review...

What is an Uninterruptible Power System?

An uninterruptible power system (UPS) is a power supply system that provides uninterruptible power to a load by supplying power from a battery when the input power source or mains power fails. When a power failure occurs, the UPS can immediately take over the power supply and convert the direct current in the battery into alternating current, which is used to output and maintain the normal operation of various machines.

Which APC UPS battery backup surge protector is right for You?

For those seeking a budget-friendly option, the APC UPS Battery Backup Surge Protector BE425M offers fantastic value without compromising on essential features. With a 425VA/225W capacity, it provides enough power to safely shut down computers and small electronics during outages.
