# Portable emergency power supply device

Why do you need a portable power station?

When you find yourself without access to electricity, the right portable power station can keep your most important electronics going. I love that portable power stations are silent (unlike home generators) and have all the right outlets and ports to power my electronics and appliances during a power outage or camping trip.

Can a power station be used as an uninterruptible power supply?

Yes, a power station can be used as an uninterruptible power supply, but with a big caveat. Many stations have automatic switchovers that reform the power sine wave in 20ms. Most dedicated UPS devices have a switchover of <5ms.

What is the best portable power station?

The Jackery Explorer 1500 Portable Power Station is our recommendation for the overall best portable power station. With a large battery capacity that can power a television for 21 hours and a variety of outlets and ports, it's suitable for home emergencies, camping, and job site use.

How to choose an emergency power station?

Portability is an important factor in selecting an emergency power station, as its weight can greatly affect how easily you can transport it during an emergency or outdoor adventure. These power stations can range from 35 to 115 lbs, and this significant variation impacts their usability in various situations.
