
Price of a 20kW Solar Containerized Solar Unit in the United States

How much does a 20kW Solar System cost?

Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone. The typical cost of a 20kW solar system is approximately \$40,000. However, it is important to note that prices have come down substantially over the past decade, making solar energy more affordable for a wider range of consumers.

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.

How much does a solar panel system cost?

Installing a solar panel system can save you tens of thousands of dollars over time, but the upfront costs aren't exactly chump change. In 2024, the average cost for a 20 kilowatt (kW) solar panel system hovers around \$55,000 before incentives, though actual prices vary depending on your location and installation specifics.

How much electricity does a 20 kW solar system produce?

A 20 kW solar panel system produces about 29,033 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 20 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 20 kW solar system cost?
