What is the global solar PV inverter market value?

The global solar PV inverter market reached a value of US\$8.3 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$12.3 Billion by 2032, exhibiting a CAGR of 4.4% during 2024-2032.

What drives the solar inverter market?

The growth of the market is driven by a large inflow of investments in the renewable energy sector and rise in the number of residential solar rooftop installations. The report covers the inverter market segmented into type, output power rating, output voltage, sales channel, end user, and region.

How a solar PV inverter is transforming energy production?

As per the analysis by the IMARC Group, the solar PV inverter is undergoing several changes to revolutionize energy production, maximize revenue, decrease environmental impact, and improve product reliability and efficiency.

How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.
