
Promotional Offer for High-Pressure Energy Storage Containers Used at Drilling Sites

Which rigs have energy storage systems for onshore drilling?

The energy storage system developed for onshore drilling is among the world's first ones. As a foreign analog, only the project of the German rig manufacturer Bentec implemented in Oman can be highlighted. In 2017, the container-type 0.9 MW Bentec ESS with a storage capacity of 0.3 MW was put into trial operation on the KCA Deuteg T-94 rig.

What are intelligent pressurized containers?

At the heart of our offering are the intelligent pressurized containers, engineered to perfection to cater to the unique needs of each client. Featuring sophisticated HVAC and power control systems, these containers are constructed to ensure a secure and conducive environment for both personnel and equipment.

What makes our offshore energy storage containers unique?

Featuring sophisticated HVAC and power control systems, these containers are constructed to ensure a secure and conducive environment for both personnel and equipment. Our commitment to customization means every container is a step towards operational excellence in offshore energy storage.

Can electric energy storage systems be used for drilling rigs?

The work to develop electric energy storage systems for drilling rigs has been underway worldwide for the last 5 years, however, mainly targeting isolated offshore rigs.

Discover next-gen ground gas storage with Steelhead's lightweight, high-pressure composite vessels. Ideal for H₂, CNG, and industrial use--maximize capacity, minimize footprint, and ...

The price of an energy storage container can vary significantly depending on several factors such as its capacity, features, quality, and the technology used. Here is a ...

Energy storage systems are an important component of the energy transition, which is currently planned and launched in most of the developed and developing countries. ...

Our hydrogen storage containers offer the highest safety levels in high-pressure storage and transportation of large volumes of hydrogen, combined with the low price of our services per ...

Discover the future of offshore energy storage with TLS Offshore Containers, your

premier partner for intelligent pressurized containers. Tailored to the rigorous demands of ...

How can energy be stored safely and transported efficiently? With the COSMOS high-pressure system from heiserTEC, we offer a modular solution that is used worldwide in ...

Stationary containers for demanding applications in onshore and offshore environments
Stationary container solutions form the backbone of many facilities in the oil and gas industry. They are ...

Advanced Container Co. supplies rugged, secure, and customized shipping containers built to withstand the harsh demands of oilfield and offshore environments. With over 35 years of ...

The findings of this study can help to better understand which type of storage system is the most efficient for energy systems with temporary high load peaks, like drilling rigs.

Our hydrogen containers offer a flexible and location-independent solution for energy supply. They are available in 20ft, 30ft and 40ft sizes and can be individually adapted to your ...
