## Rechargeable battery mobile inverter

Does xindun provide rechargeable power inverter with battery charger function?

Xindun provides rechargeable power inverter with battery charger function, compatible with various battery types. Inverter full power design, strong loading capacity.

4KW/5KW/6KW/7KW, DC48V/96V/192V to AC110V/120V/220V/230V/240V

Rechargeable Power Inverter Feature

What is a recharge inverter battery?

All the recharge inverter batteries are the lead acid battery. Lead acid batteries contain two electrodes dipped in the electrolyte solution. The electrodes are Lead and Lead dioxide, hence the name lead acid battery. The sulfuric acid is used as the electrolyte.

How does a 5S inverter work?

If the power of the connected loads is over 5%, within 5S the inverter will automatically convert DC to AC to supply power for the loads. The LCD shows the output voltage.

03 Battery priority mode: When the grid and battery are connected to the inverter, battery will supply power to the loads first.

What are the working modes for the inverter?

We offer 3 optional working modes for inverter (transfer time  $\leq 4\text{ms}$ ): 01 Grid priority mode: When the grid and battery are connected to the inverter, grid will supply power to the loads directly after voltage being stabilized and charge batteries via inverter.
