
San Diego Charging Pile Energy Storage Project

How much battery storage does SDG&E have?

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

How many megawatts will a new energy storage facility add?

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to be fully operational by June 2025.

Will 131 MW energy storage facility be fully operational by June 2025?

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to be fully operational by June 2025. This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility.

Why did SDG&E lower the average monthly electric delivery bill?

In fact, SDG&E was able to lower the average monthly electric delivery bill for residential customers for the second year in a row, in part, because the company returned \$200 million in federal tax credits to customers for recently completed battery storage.
