What is SCU industrial uninterruptible power supply system?

SCU industrial uninterruptible power supply system has created a new generation of green, environmentally friendly, high-efficiency and energy-saving uninterruptible power supply systems for the data center of Huitian Cloud Industrial Park, helping the safe operation of the data center.

How does an industrial uninterruptible power supply work?

While industrial uninterruptible power supply can work like a back-up power source, which converts utility power from AC to DC and provides DC current to battery for storage. When utility power fails, power stored in the battery will be discharged to supply the equipment.

How does ups work if a power supply fails?

Normally UPS converts AC power from Utility to DC for charging the connected battery. When the utility power fails, UPS electrical device works like backup power, and UPS will switch to battery mode, inverts DC to AC power and continue to run the equipment.
