## Silane solar container battery

Will Rec supply silane?

Under the terms of the agreement, REC will supply Sila with high-quality, US-produced silane for use in the production of Sila's breakthrough nano-composite silicon anode material, Titan Silicon.

Why is REC Silicon partnering with Sila?

"We appreciate the opportunity to support Sila and their production of next-generation battery materials," said Kurt Levens, CEO at REC Silicon.

Will Sila's Titan silicon anode power electric cars?

Sila's Titan Silicon anode will next power electric vehicles, including an upcoming version of the Mercedes-Benz G-Class and will be used within Panasonic Energy's next-generation lithium-ion batteries, which will also serve the automotive industry.
