## Solar power station for sale in Costa-Rica

Who sells solar panels in Costa Rica?

American firms have a strong presence in Costa Rica by selling their products through local distributors or joint ventures. The main competitors of U.S. businesses in the solar area in Costa Rica are Chinese brands. Most companies selling solar systems are local companies that assemble Asian solar panels with some U.S. made components.

How much solar power can Costa Rica use?

Utilising about 6% of total solar power potential and 25% of Costa Rica's wind power potential would suffice to supply enough energy to do so. Electricity costs can be reduced by almost US\$1 cent per kWh of power generation by deployment utility-scale and decentralised renewable energy installations.

Who is the target market for solar energy in Costa Rica?

According to the Costa Rican Institute of Electricity (ICE) and the Costa Rican National Power and Light Company (CNFL), both government entities, the target market for solar energy in Costa Rica, remains to be households or companies that consume between 200kw/h and 3,000kw/h. ICE and CNFL have been installing photovoltaic systems.

Is solar power a new energy source in Costa Rica?

Like wind power, solar power is another newer energy source in the country. The first solar power projects in the country were established in 1978 by just a few researchers from public universities at the Solar Power Laboratory at the National University. During 2012, Costa Rica inaugurated the Miravalles Solar Plant next to the Miravalles Volcano.
