
Spanish rooftop solar panels

What is a solar span roof panel?

SolarSpan is a three-layered insulated roof panel that consists of two layers of COLORBOND steel laminated to a high-performing polystyrene core. Its high level of strength and durability makes it ideal for Australian patios, pergolas, carports, verandas, decks, garages and homes. What Are the Benefits of SolarSpan?

What makes solar span a good patio roof?

Low Maintenance- SolarSpan's COLORBOND steel roof and ceiling gives a long-lasting, easy to clean finish. Strength - Unlike a single skin patio roof, SolarSpan's strength allows owners to walk on it for maintenance or to retrieve the occasional stray ball. Simple Construction - No rafters or battens are required.

What is solar span insulated roofing?

SolarSpan insulated roofing has been around now for a number of years and has grown in popularity amongst homeowners looking to create an all year round outdoor living space. In the time I have been at Great Aussie Patios, SolarSpan has fast become the roofing of choice for new patios in Perth. What is SolarSpan?
