
Subsidy for new energy storage power stations in Ukraine

Can a subsidization system take Ukraine out of energy poverty?

However, experts believe that the existing subsidization system is incapable of taking them out of energy poverty. Ukraine is not the only country in the world where citizens receive monetary assistance to pay for housing maintenance and utility services.

How has Ukraine improved its energy security?

Repair: 1.8 GW of power capacity from thermal power plants repaired. Stabilise: Wind and solar projects rolled out across Ukraine to bring energy security to critical services as well as households and businesses, including via the "Ray of Hope" project which is allowing for the installation of solar panels to power hospitals.

How will a new energy package affect Ukraine?

It will also boost the security of supply in Ukraine and the wider region, as the Commission will assist with the necessary purchases of gas. Crucially, with a massive acceleration of domestic renewable power production, this package will increase the overall resilience of the Ukrainian energy system.
