# Swedish Communications 5G Base Station Tender

Does Sweden have 5G?

5G deployment is underway in Sweden. In October 2023, 92% of the population had coverage from 5G networks. The government has not imposed any requirements on operators regarding the deployment of 5G, but there are coverage requirements in various frequency bands in order to improve mobile coverage in Sweden.

Where is the 6g network being installed in Sweden?

The 6G network is currently being installed in the underground lab at Luleå University of Technology. Are you looking for information on 5G regulation and law in Sweden? This CMS Expert Guide provides you with everything you need to know.

Why did Sweden delay 5G implementation?

The Swedish Electronic Communications Act was then amended to protect Sweden's national security interests, delaying new spectrum licences in the 3.5 GHz band. Telecom operators have also encountered delivery problems, causing further delays to 5G implementation. There are no known decisions regarding non-compliance with 5G concessions obligations.

Does Sweden need a 5G licence?

The government has not imposed any requirements on operators regarding the deployment of 5G, but there are coverage requirements in various frequency bands in order to improve mobile coverage in Sweden. There are no specific licence conditions for the roll-out of 5G.
