
T-blockb uninterruptible power supply

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions provide 24 V DC power supply for up to several minutes. Equipped with ultracapacitors, these solutions are designed for long service life and operation in demanding temperature ranges.

Why should you choose block power supplies?

BLOCK has one of the largest ranges available of switched-mode power supplies, electronic circuit breakers and uninterruptible power supplies for reliable power supply and distribution, as well as for the protection of control systems through to comprehensive machinery and plant systems. For the ideal solution to individual requirements.

What is a block power supply?

BLOCK power supplies provide significant power reserves for high switch-on currents thanks to powerful Top Boost and Power Boost technology. The BLOCK Development Center designs electronic products featuring extraordinary electrical and mechanical strength for demanding customers in industry.

Are block power supply solutions ready for Industry 4.0?

Comprehensive features ensure that BLOCK's power supply solutions are ready for use in Industry 4.0. Connecting a line circuit breaker to a PLC or industrial PC for instance allows individual channels to be controlled and connected remotely.

BLOCK has one of the largest ranges available of switched-mode power supplies, electronic circuit breakers and uninterruptible power supplies for reliable power supply and distribution, ...

Characteristics Benefits > Combined power supply with charge and control unit > Fast tripping of conventional circuit breakers > Battery modules get detected automatically > Reliable signalling ...

Uninterruptible Power Supply (UPS) Reliability of power sources is an increasing challenge in many sectors and battery-backed uninterruptible power supplies (UPS) are one ...

Uninterruptible power supplies provide power to critical loads in the event of a power failure. Unlike emergency generators, UPS systems provide power immediately, but

only for a short ...

An uninterruptible power supply (UPS) is just such an alternative source. A Uninterruptible Power Supply (UPS) generally consists of a rectifier, battery charger, a battery bank and inverter ...

AMETEK Solidstate Controls has been building the world's most robust, industrial, uninterruptible power supply systems (UPS) for more than 56 years. Each system is created specifically to ...

Businesses today invest large sums of money in their IT infrastructure, as well as the power required to keep it functioning. Uninterruptible power supplies (UPS) are an ...

BLOCK has one of the largest ranges available of switched-mode power supplies, electronic circuit breakers and uninterruptible power supplies for ...

How Does Uninterruptible Power Supply Work In today's technology-driven world, ensuring the continuous operation of critical systems is paramount. Interruptions in power can cause data ...

APC 3u POWERDECK MRF28 + T/BLOCK. Weight: 9.77 kg. Battery type: No internal battery: uses external battery system, Interface: Rectifier Interface MRF28-24, MRF28 ...

Switched mode power supplies, electronic circuit breakers, uninterruptible power supplies, redundancy modules, and accessories for the reliable supply of your systems.

Uninterruptible power supplies (UPS) protect the 24 V supply voltage against unexpected power failures. In the BLOCK portfolio, capacitive UPS solutions provide 24 V DC power supply for ...

Characteristics Benefits > Combined power supply with charge and control unit > Fast tripping of conventional circuit breakers > Battery modules get ...
