## Telecommunications companies have few base stations

Which countries dominate the Global LTE base station system market?

By 2025, Asia-Pacific (APAC) dominates the global LTE Base Station System market, accounting for approximately 44% of global share, primarily driven by large-scale deployments across China, India, Japan, and South Korea.

How much is the Global LTE base station system market worth?

The global LTE Base Station System market is valued at approximately USD 51,545.38 million in 2025 and is projected to reach USD 86,621.51 million by 2031, expanding at a CAGR of 18.89% (source: Global Growth Insights).

What will the Global LTE base station system market look like in 2025?

The global LTE Base Station System market in 2025 stands at a critical juncture--transitioning from traditional, hardware-centric network architectures to software-defined, intelligent, and energy-efficient infrastructures that bridge the gap between 4G LTE and next-generation 5G ecosystems.

How many 5G base stations are there in China?

With 4.19 million 5G base stations already operational across China, the MIIT emphasized that "promoting 5G revolution and 6G innovation will be one of the priorities" for 2025, according to a report by Chinese newspaper China Daily. Chinese main operators are China Mobile, China Telecom and China Unicom.
