
There are several charges for battery cabinet replacement in Copenhagen

Who is responsible for a battery in Denmark?

As a company you are subject to producer responsibility for batteries the first time you make a battery available on the Danish market - whether you are the producer, importer, or distributor. Any supply of a battery for distribution or use in Denmark. This only applies when it involves a commercial activity.

Can I resell a battery in Denmark?

Any supply of a battery for distribution or use in Denmark. This only applies when it involves a commercial activity. If you resell batteries that have already been made available by another company - and you do not change the product or the marking - you are not subject to producer responsibility for batteries. Which types of products are covered?

Who pays for portable batteries and accumulators in Denmark?

Producers and importers are required to pay for the quantity of portable batteries and accumulators which they have placed on the Danish market. The payment is collected by SKAT, the Danish Customs and Tax Administration. See the current payment rate for portable batteries and accumulators, which have been placed on the market.

How does the Danish Environmental Protection Agency regulate batteries?

The Agency carries out control and supervision of compliance with the rules of the Battery Regulation and Statutory Order no. 986 of 20 June 2025. This also means that any complaints against decisions made by DPA may be brought before the Danish Environmental Protection Agency.
