
Uninterruptible Power Supply Price for Bangkok Hospital

What is an uninterruptible power supply (UPS)?

*Definition: The Uninterruptible Power Supply, or UPS for short, is a critical component of computer setups and other hardware systems that may need to function for a period of time following a loss of mains power. When this happens, the UPS powers the system until utility power is restored and it resumes recharging its internal battery backup.

Are uninterruptible power supply systems reliable?

Uninterruptible power supply systems are highly reliable and responsive that guarantee immediate power supply in a power failure. However, the major concerns associated with these systems is the cost. The adoption of UPS systems requires high amount of initial investment.
