
Uninterruptible power supply for large equipment

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS) provides a source of power for the equipment it protects. If there is a disruption to power, the UPS has an on-board battery to automatically supply to electrical equipment until the disruption is over or back-up generators kick-in. What is a WIMES UPS?

What is a water power supply (UPS)?

WIMES (Water Industry Mechanical and Electrical Specifications) UPS (uninterruptible power supply) is a robust critical power system built for harsh atmospheres such as dusty environments, moisture and humidity, as well as extremes in temperature and sites where robust solutions are required.

How does an industrial UPS system work?

An industrial UPS system works by storing electrical energy in batteries and providing power to equipment when there is a disruption in the main power supply. It instantly switches to backup power, preventing downtime and protecting sensitive systems from damage.

Why should you choose Mitsubishi Electric uninterruptible power supplies?

At 99.9995%, Mitsubishi Electric Uninterruptible Power Supplies achieve the highest equipment reliability among all UPS suppliers, ensuring you - and your customers - are protected against downtime 24/7/365.

An industrial UPS (Uninterruptible Power Supply) system is a backup power device designed to protect critical equipment in industrial settings from power outages, voltage fluctuations, and ...
